Rina Osman

Software Developer

Ottawa, ON | rinaxosman@gmail.com | LinkedIn | GitHub | rinaosman.com

Experience

Government of Canada – Full-Time Software Developer **Jan 2026 – Present**

- Design and develop end-to-end LLM-powered AI **agents** and **MCP** servers using Python, integrating enterprise APIs, custom tools, authentication, and automated workflows.
- Containerize, deploy, and maintain AI services using Docker, Kubernetes, Helm, and Azure, managing infrastructure configuration and deployment across environments.
- Engineer **full-stack applications** and responsive UIs using React, TypeScript, FastAPI, and PostgreSQL, delivering advanced search, SQL querying, and data management features
- Implement secure authentication, role-based access controls, and backend optimizations to enhance application security and performance

Government of Canada – Software Developer Intern **Sept 2024 – Apr 2025**

- Supported backend development, cloud infrastructure, and deployments, including database integration and access management
- Developed Java-based data processing tools and migrated legacy functionality to Python, improving maintainability
- Contributed to frontend development and optimized internal application workflows

Government of Canada – Business Analyst Intern **May 2024 – Aug 2024**

- Streamlined data collection, analysis, and reporting workflows using Power BI and Excel
- Designed interactive dashboards and data visualizations to communicate key metrics, track performance, and provide actionable insights for an internal initiative.

Government of Canada – Business Analyst Intern **May 2023 – Dec 2023**

- Contributed to **web development** projects using the **Hugo** framework.
- Conducted data research and analysis to develop internal reports, supporting event planning and strategic communications.

AINA software – Application Developer Intern **Nov 2023 – Mar 2024**

- Created app prototypes and UX/UI designs. Frontend development and application testing.

Dimension Sportive et Culturelle – Volunteer Project Consultant **May 2023 – Sept 2023**

- Improved the organization's business plan, website strategy, and budgeting and financial planning

Education

University of Ottawa, Honours BSc in Computer Science **Sept 2021 – Apr 2025**

- **Ideas Lab Winner**: Pitched a social enterprise aligned with the UN's SGDs Goals
- **Leadership**: Media Director (IRUO), CS Club Council Member, UOMSA Marketing Committee
- **Hack the Hill 2024**: Built a P2P file-sharing system for the Ciena challenge
- **uOttaHack 8**: Developed an LLM-powered study assistant using NLP and prompt engineering
- **Hack the Future 2026**: Built TrendMine, an AI-powered startup idea generator
